

TWEED55, Like its brother Plex55 are the evolution of our awarded KOLT45.

Thanks to our own designed FETs we engineered a preamp section able to mimic the behavior and harmonic content of a tube preamp, in this case an American Clean Classic like Fender Blackface Era. Coupled with our designed Class D power section, the result is an incredibly powerful miniamp, super fast and harmonically rich, able to surprise you even if you don't have a 4 ohm cabinet available. Perfect as backup, you'll shortly bring only your Tweed55 for your gigs or rehearsals.

RECOMMENDATIONS:

- Tweed55 is a real amplifier, and drain a lot of current, so it's mandatory to use his own power supply included.

- We recommend to connect first the PSU connector to your Tweed55, THEN connect the psu to wall wart, to avoid any sparkles.

- NEVER connect your Tweed55 to the input of an amplifier or any other devices, its Speaker out must to go STRAIGHT into a passive guitar cabinet, from 4 to 16Ohm.
